

Clark Forklift

Performing worldwide, there are at this time 350,000 Clark forklifts and lift vehicles in operation, with more than 250,000 of those in commission in North America. Clark has five major lines of lift trucks across the world, making it one of the most expansive organizations in the industry. Heavy duty trucks ranging from 1,500lb to 18,000lb capacities, dual fuel, petrol, LPG, hand powered lift trucks, narrow-aisle stackers and electric riders are some of their specialties.

Clark Totalift, handles more than 120,000 individual parts built for 20 unique designs of forklifts and automated equipment. Your local Clark Supplier is your total source for availability of all your components requirements provided by Clark Totalift.

Clark has a extraordinary Parts Distribution team. The components warehouses are conveniently stationed in Changwon, South Korea and Louisville, Kentucky to ensure exceptional service to both their buyers and their dealers. For over 90 years, Clark has surpassed industry standards, being one of the most actively advancing manufacturers. Motivated to offer the highest level of value and service to our customers, Clark remains on the leading edge when it comes to enhancing output and benefiting performance.

Globally, Clark has one of the most amazing dealer support networks. With over 550 locations globally, supplier representation in over 80 countries and 230 locations in North America, their high level of dedication to their consumers predominates the materials handling market.

Clark proudly remains an innovative leader of the material handling industry, revolutionizing protection features such as the operator restraint system. This exceptional dedication to safety is currently a standard feature on every forklift.

Clark has a continual objective to possess the No. 1 quality system in the industry which is demonstrated by their dedication to ISO standards. Clark, is the first manufacturer of forklifts and lift trucks to be internationally certified with quality standard ISO 9001 in all of its manufacturing plants. Furthermore, the ISO 14001 Environmental Conservancy System certificate was awarded to Clark's Korean facility in 2001. This paramount achievement permits Clark to be ready for any number of environmental limitations, thus placing them in a dominant industry position.

Resource Efficient Production

Clark has selected the very economical and advantageous structure of "Lean Manufacturing" for its assembly plants and use of resources. This structure was established to acknowledge the most effective method of production plant stewardship and ensuring maximum proficiency. Clark has concluded this transition of its Korean facility. COPS which is Clark Optimized Production System, equally focuses on quality of product and services and production efficiencies.

Engineering

Clark's product engineers and suppliers communicate together to improve the effectiveness and excellence of their products while minimizing costs. The contemporary value engineering agenda combines progressive product development and offers improved consumer support and service within the industry.
